📍 Bangalore

Technical Competency

Tools & Framework

- UiPath – Studio, Robot and Orchestrator, RE Framework, Selenium, Pytest, BDD, TestNG, Git and Karate

Programming Language

- Python, Java, VB .NET

Defect Management Tool

- JIRA, HP ALM

Database/UI Scripting

- SQL & Mongo/ Java Script, HTML & CSS

Certificates

- Certification in UiPath, Java, Selenium, MySQL

Hands-On Experience

- Jenkins, Git, Control M, Nifi, AWS S3, Azure Blob, CDS, WinSCP, Putty and Ready API

Work Experience

Atos – 03/2022 – Present

- Role – Senior RPA Developer
- Domain – B2B Travel Platform

Fidelity Investments – 05/2019 – 03/2022

- Role – Lead Software Engineer
- Domain – Investment Banking

Maveric-Systems – 04/2018 – 04/2019

- Role – Automation Engineer
- Domain – Banking

Infosys Skava – 03/2016 – 04/2018

- Role – Quality Engineer
- Domain – E-Commerce

Career Objective

6+ years of Experience in Robotic Process Automation and Test Automation. Exhibits expertise in analyzing processes for automating amenability and delivering quality process. A recognized professional, proactive, flexible and a recognized team member with efficient leadership & people management skills in planning, prioritizing, scheduling, monitoring, mentoring and providing proactive resolution to the operational and technical issue for the team.

Skill & Professional Summary

- Sound knowledge on multiple SDLC methodologies like Agile/Scrum and Waterfall model.
- Experience in developing from end to end automation solution to the current manual work using UiPath.
- Experience in developing the Automation using UiPath, Java and Python.
- Experience in building RPA (Robotics Process Automation) solutions using UiPath and Worked on UiPath orchestrator to manage Bot workloads, scheduling and monitoring etc.
- Experience in building different Automation frameworks from scratch and Strong analytical, problem solving and programming skills, cohesive team worker with exceptional Planning and execution.
- Experience in working on different automation like Excel, Web, Email, Pdf, Desktop, Database, Document Understanding, Action Center and Orchestrator API.
- Experience in Selenium, REST API Services, database querying using SQL and Mongo DB.
- Innovative ideas to reduce the time span of a process and Involved in Support activities.
- Preparing the Documents for developed bots like solution design document, User Manual and RPA run bot for the users.
- Expertise in understanding business requirement, designing, development, testing, defect tracking, preparation of completion report, deploying solution to Pre-Production, Hyper care and Go Live of process.

Education Background

Computer Science and Engineering

- Kathir College Of Engineering
07/2011 – 04/2015 – 7.27 CGPA

Personal Details

- **DOB** – 31/10/1993
- **Hobby** – Photography

Roles and Responsibilities

- Gathering business requirements, analyzing key stroke and process design document and Identifying impact areas in advance.
- Designing solution design document and getting approval from BA and Architect.
- Developing automation solutions as per requirement and push the package to dev orchestrator with unit test Coverage and responsible to get code review from Architect.
- Responsible to maintain the process workflow in GIT for version Control.
- Responsible to interact with team members and different systems & modules for testing and ensure that there are no delays and timeliness are met and analyzing the problems and implement the processes to improve.
- Responsible for bug fixing and redeploying the process workflow to the orchestrator with different versions.
- Responsible for sending the daily Progress status report at the end of the day by highlighting the activities and Issues.
- Responsible for preparation of completion report, deploying solution to dev, pre-production , hyper care and go Live of the process.

Experience Summary

Project 1 : Concur EMEA – End to End

- RPA solution to check the availability of corporate profile in GDS and create OBT Site Build and perform different booking like Car, Hotel, Flight and combination and do end to end operation validation.

Project 2 : V-Payment Billback – End to End

- RPA solution to open different files like AIDA/AMEX and filter out hotel itinerary and fetch the required information and process the flow end to end with different application like Amadeus ,AGM and Connect hotel.

Project 3 : Customer Goals Enabling – End to End

- Assessing capability of robotic process automation to enable goals for the customers with complex calculation involved in retirement, education and saving goals.

Project 4 : Stockholding Retention

- Assessing capability of robotic process automation to enable to retention flow.
- Created process automation for Stockholding Trade Retention which fetch the data from one system and retained in other system for prediction and analysis.

Project 5 : Customer Interaction Retention – End to End

- As an investment company customer and broker communication will be retained for certain period of time to monitor the action performed over messages, mails and other applications.

Project 6 : Intraday Trade Statement Retention

- Assessing capability of robotic process automation to enable to retention flow.
- Created process automation for stockholding trade retention which fetch the data from one system and retained in other system for predict and analysis

Project 7 : Commercial and Retail banking T24 data process

- Assessing capability of robotic process automation to get huge data and process the banking backend flow in T24.
